The Retribution of History. History is the experience of nations. Her lessons should guide their course but just as individuals are frequently heedless of the teachings of their own dearlybought experience, so nations shut their eyes to the warnings of history until they have to mourn over their blindness in sackcloth and ashes.

Nations have no souls to be punished in the world to come, hence their punish ment must come in this. For them the "mills of the Gods grind slowly," but retribution overtakes them sooner or later and chastises their national iniquities. "He that exalteth himself shall be

territory and her liberties, her cause was that of justice and freedom; but when the soldiers of the Republic became the Protorians of an Emperor, they subserved only the ambition of a despot. Then swift and fierce retribution came down upon her. Twice in two years the Cossacks of the Don, the Pandours of the Danube, water ed their horses in the waters of the Seine, and her humiliation gave a memorable icsson to all the world.

Coming down to our own days, Russia, animated by ambition and the lust of conquest, threatens the seeing their interest endangered, interfere, and by the destruction of Sebastopol, and of the Russian fleet sunk in its harbor, effectually bring down the Mocovite pride, and for a time check the course of Russian ambition.

Five years later comes the Italian war, in which unlucky Austria loses Lombardy seven years afterwards comes the Sadowa campaign, in consequence of which she loses Venice and her last foothold in Italy, and finds herself excluded from Germany. Now, let us look at the retribution which

these nations see in the disasters of France. England, deeply mortified by the contrasts between the British and French armies in the Crimea, is gloating over French defeats and sees in them a compensation for her humiliation.
